IN THE SPECIFICATION (page 4, last paragraph, ll. 16-26):

Figure 1 shows a feed unit with a fuel pump 2, driven by an electric motor 1, of a motor vehicle, and with a connecting element 4 which is attached to a housing 3. The connecting element 4 has a connector 5 for a forward-flow line which leads to an internal combustion engine of the motor vehicle. Furthermore, the connecting element 4 has a connecting contact[[s]] 6 for the electric motor 1. The connecting contact[[s]] 6 [[are]] is arranged on a molded component 7 which is attached in a receptacle 8 of the connecting element 4. Figure 1 shows only a single molded component 7 and a single connecting contact 6. A second connecting contact and a second molded component for a second pole of the electric motor 1 are covered by the connecting contact 6 which is illustrated.
